

203.2 - Solution Calorimetry

PLEASE NOTE: The tables are presented to facilitate comparisons among a family of materials to help customers select the best SRM for their needs. For specific values and uncertainties, the certificate is the only official source.

SRM	Description	Unit of Issue	Heat of Solution (in MJ/kg) Absorbed
1655	Potassium Chloride, KCl (cr) for Solution Calorimetry	30 g	0.235

Certified values are normal font.

Reference values are italicized.

Values in parentheses are for information only.
